

SurgicEye is a manufacturer of innovative medical solutions, mainly in Oncology. SurgicEye offers unique solutions for 2D and 3D nuclear imaging and computer-assisted interventions. SurgicEye is also integrated into its mother company's development, Crystal Photonics, which provides a complete line of Nuclear Medicine and radio-guided surgery products.

You will start in a dynamic, interdisciplinary, and international team, maintaining an excellent working atmosphere and environment directly in Munich city center.

We are looking for a passionate, full-time

Software Engineer (m/f/d)

Your Assignments:

- Implementation of software according to ISO 62304
- Active participation in SurgicEye's agile software development process (with JIRA), incl. definition and performance of tests, and participating in code reviews
- Software documentation
- Support in debugging, bug fixing and (remote) servicing the software components of the installed product base of SurgicEye
- Support in regulatory affairs and product certification, incl. help with risk analysis

Your Skills:

- Computer Science degree or equivalent education or working experience
- Software development experience in C++ required
- Experience with medical image processing of advantage
- GUI experience with Qt desirable
- Excellent knowledge of English mandatory
- Very good knowledge of German strongly recommended
- Knowledge of other languages of advantage

Time / Location:

- Planned Start May 2021 (details to be discussed)
- Full Time (flexible times)
- Location: Munich, Germany

Your Benefits

- Participation in the commercial success of SurgicEye in addition to an individual bonus plan
- Flat hierarchy and potentially direct influence on the company (to be discussed together)
- Exciting international work environment
- Flexible work models support your Work-life-Balance

As an employee, you will face many exciting assignments, projects, and challenges. We offer the possibility to develop your professional profile and offer an excellent industrial and clinical network. In our young and dynamic working environment, we maintain an open and friendly atmosphere.

Please send complete application documentation to Dr. Thomas Wendler.
