

SurgicEye is a manufacturer of innovative medical solutions, mainly in Oncology. SurgicEye offers unique solutions for 2D and 3D nuclear imaging and computer-assisted interventions. SurgicEye is also integrated into its mother company's development, Crystal Photonics, which provides a complete line of Nuclear Medicine and radio-guided surgery products.

You will start in a dynamic, interdisciplinary, and international team, maintaining an excellent working atmosphere and environment directly in Munich city center.

We are looking for a passionate, full-time

Service Technician (m/f/d)

Your Assignments:

- Installation and training for direct customers and distributors
- Service and quality assurance for the installed base of products in Europe
- Improvement of service and training material
- Support with IT infrastructure (software and hardware)
- Support in production and handling of goods
- Support in regulatory affairs and product certification

Your Skills:

- Degree as technician or equivalent education in Biomedical Technology, Mechatronics, IT
- Technical and service experience required
- Clinical and production experience of advantage
- Experience in maintenance of IT hardware and software required
- Good knowledge of MS-Office applications desired
- Strong communication and organization skills
- Willingness to travel (up to 40% on peak times during the year)
- Excellent knowledge of English mandatory
- Very good knowledge of German strongly recommended
- Knowledge of other languages of advantage

Time / Location:

- Full Time (flexible times)
- Location: Munich, Germany

Your Benefits

- Participation in the commercial success of SurgicEye in addition to an individual bonus plan
- Flat hierarchy and potentially direct influence on the company (to be discussed together)
- Exciting international work environment
- Flexible work models support your Work-life-Balance

As an employee, you will face many exciting assignments, projects, and challenges. We offer the possibility to develop your professional profile and offer an excellent industrial and clinical network. In our young and dynamic working environment, we maintain an open and friendly atmosphere.

Please send complete application documentation to Dr. Thomas Wendler.
